

# Elements of Cartography

## Serving the Community with Cartography

An introduction to the **art, craft, and science** of cartography. This winter offering will be run as a **service learning** course in which students will engage in a community **mapping collaboration** with Ohio State's Dept. of African American and African Studies Community Extension Center (CEC) and other **community organizations** in the near east side of Columbus. Student activities will focus on issues surrounding neighborhood **regeneration** through mapping of community **assets**, capabilities, and abilities.
